

Please refer to the "OpenEHR-relevant-data-in-diadem.xlsx" spreadsheet for a list of what openEHR-relevant data is collected by the diadem app

orange highlighting in the 'example data for diadem as downloaded from the openEHR server' shows which items have been deleted to form the reduced example data list - this list is used to populate the json object posted to the openEHR server

| example data for diadem as downloaded from the openEHR server | reduced example data as posted to the openEHR server | match with diadem app |
